

## **SIZING CHART.**

When measuring a young child you will notice there is very little difference between hip, chest and waist measurement. However, your child may be different from the standard measurements. Should your child's measurement differ by more than 1cm (1/2") from the measurements listed below please state so in the message box of the Check out/ordering process.

For example, if your child is 13kg (28lbs) with a chest of 53cm (21") and waist 55cm (21.8") we need to know - especially for the trouser! Also remember that garments take **UP TO 8 weeks** to create so please allow for this extra growth time.
